WHY FACILITIES CHOOSE EZ-50

The **Enviro-Z™ Hazardous Corrosive Spill Kit** captures, stabilizes, and immobilizes hazardous corrosive liquids — converting them into **inert solids suitable for legal disposal**. It mitigates vapor release, prevents ongoing surface attack, prevents thermal excursions, and eliminates the wet, slippery residue that leads to secondary injury. Fully equipped and compact enough for a service vehicle, power room, or mounted spill station.

Kit Contents

EZ-50 — HAZARDOUS CORROSIVE SPILL KIT

01	Refillable Rotomolded Storage Case	1 ea
02	Enviro-Z™ Corrosive Absorbent Socks (3"×5')	4 ea
03	Enviro-Z™ 5 lb Shaker	1 ea
04	Enviro-Z™ 10 lb Spout Bag	1 ea
05	Polymer Disposal Bags	5 ea
06	Tamper-Proof Labels	6 ea
07	Chemical Gloves	2 ea
08	Safety Glasses	2 ea
09	Corrosive / Battery Wipes	1 ea
10	Protective Apron	1 ea

STABILIZES & IMMOBILIZES

Battery Acid · Muriatic · Sulfuric · Hydrochloric ·
Caustics · Chlorine · Alkaline · Ammonia · Detergents ·
Bleach · Drano · Bases

- ✓ **Stabilizes, Not Just Absorbs**
Converts corrosive liquids into inert solids for legal disposal.
- ✓ **Prevents Thermal Reactions**
Controls thermal excursion to reduce risk.
- ✓ **Fully Equipped & Universal**
Durable, waterproof options for mounted spill stations.
- ✓ **Stops Surface Attack**
Cuts vapor release and ongoing corrosion.
- ✓ **No Slippery Residue**
Prevents secondary slip injuries.
- ✓ **RCRA Compliant Disposal***
Turns corrosive liquids into a solid, effectively treating D002 wastes.
